SAVING THE PLANET AND MAKING YOUR LIFE HEALTHIER!

As environmental concern is becoming a necessity all over the world, TPU (Thermoplastic Polyurethanes) is ready to be the future material for inflatable products. TPU is totally biodegradable, therefore environmentally friendly, and can decompose itself in 5 to 10 years. Compared to standard PVC commonly used for inflatable products, TPU is innovative and revolutionary, and helps us save our planet, making our lives healthier at the same time.

Super advantages of TPU:

- Resistance to low temperature:

TPU can remain a good elasticity in the very bad environment even under low temperature up to -30°C .

No matter where you go, it works!

- Excellent durability:

The tensile and puncture strength is twice than traditional pvc products and the seam strength is better as well.

- Super tough:

TPU provide excellent support to the people's body, the pressure resistance is 3 times more than traditional PVC.

- Non toxic:

eco-friendly completely, contains no heavy metals or toxic chemicals, top healthy for human being.

- Light weight:

Weights one third less than a common PVC same structure airbed, very easy to compact and carry to everywhere.
